

Equipment Rider – Rocking Horse

All capitalized terms in this Rider shall have the same meaning as defined and used in the Artificial Ice Events LLC Contract For Services to which it is attached.

1. Location Requirements: The World's Largest Rocking Horse (the "Rocking Horse") requires a flat smooth surface for operation. It is a large, heavy object that has the ability to damage flooring.
 - 1.1. If installed indoors, protective matting is required and must be provided by the Customer.
 - 1.2. Floor space clearance of no less than twenty five feet by eight feet (25' X 8') and overhead clearance of no less than eighteen feet (18') is necessary. Access to the installation location must also meet these same requirements, including access to any interior installation location through an overhead door of no less than ten feet by eighteen feet high (10' X 18'). Vehicle access for a twenty four foot (24') truck must be provided to within fifty feet (50') of the event location.
 - 1.3. AI must have the ability to install bolted-in side rails at its discretion for the safety of patrons.
2. Installation Volunteers: Customer shall provide two volunteers during set up period.
